DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims appear to be a literal translation, not clear in the subject for “which”, line 4 of page 14, “being”, line 6 of page 14, and being not understood in “being engaged ...on said guide carriage F2 in the guide slot of said front lamella section carrier”, lines 6-9.

Claim 10 is incorrect in “radar”.

Claim 11 lacks antecedent for “on the source guide”. Clear antecedent should be provided for all claimed terminology per the above statute.

Claim 12 is not understood in total.

Claim 22 lacks antecedent for “the part of the control rocker which extends...”.

Note that “(10)” page 14, line 5 is apparently an error for --7--. Note that “F2” line 5 from the end of claim 1 should be enclosed in parentheses.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the pivot axes next to one another, claim 9, the locking lever is biased, claim 19, and the lamella sections supported by control

Art Unit: 3612

rockers, claim 20 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

4. Claims 1-22 would appear to be allowable, as best understood, if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

5. The following is a statement of reasons for the indication of allowable subject matter: The primary reason for allowance is the recitation of dual pivot axes on each guide carriage supporting the section carrier and the control rocker, not deemed to be present in the references of record.

Priority

6. No copy of the EP document is filed.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Salz and Farber are cited to show further lamella roofs.
